# BOLTED NOT TUCKED

Discover the new modules of our optimized 3U/7PU portfolio.

We have optimized our popular and proven 3U/7PU modules even further. All modules now have a label strip. The fiber optic adaptors of most modules are now bolted in place for even higher reliability. The part numbers remain the same. Modules with E2000, E2000 duplex compact, ST duplex, LC quad and the new particularly

space-saving MDC quad have been added. The fiber portfolio was rounded off with 62.5  $\mu\text{m}$  OM1 fibers which are still in use in many legacy networks. All of the new modules are fully compatible with legacy Telegärtner 1U and 3U chassis of course.

## Ordering information

Adaptor	Number	Label	bolted	tucked	OS2/PC	OS2/APC	OM1	OM2	OM3	OM4

# EASY, QUICK, RELIABLE.

The TICNET configurator is a convenient and quick way of ordering pre-assembled 3U/7PU modules from the factory. Just follow six simple steps to order the product you need:

- 1 Select type of product
- 2 Define 3U/7PU module
- 3 Check final product
- 4 Add product to shopping basket
- 5 Enter address details
- 6 Send inquiry
