

Modular Front Plate

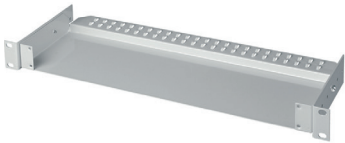

for 19" 1 HU FO Patch Panels

The growing number of different optical connectors in networks increasingly necessitates the use of mixed equipment in patch panels. With the modular front plate for 19" 1 HU FO patch panels, up to three 3 HU/7 TU front plates for ST, SC, LC and E2000 adaptors can be fitted. A maximum number of different connector faces can therefore be implemented on just one height unit. The special design enables the modular front plate to be fitted to different 19" 1 HU FO patch panels.

Order no.	Description
H02025A0610	Modular Front Plate for 19" 1 HU FO Patch Panels for maximal 3 pcs. 3 HU/7 TU front plates

Suitable 19" 1 HU FO Patch Panels
